EDUCATION

Vellore Institute of Technology, Bhopal <i>Bachelor of Technology in Computer Science and Engineering</i>	2023 - 2027 CGPA: 8.75/10
JSS R. S. Hukkerikar Pre-University Science College, Dharwad <i>Class XII (Department of Pre-University Education, Karnataka)</i>	2023 Percentage: 89.3%
Classic International Public School, Dharwad <i>Class X (ICSE Board)</i>	2021 Percentage: 80.5%

EXPERIENCE

Advan Drive Technology <i>Full Stack SDE Intern - New Delhi</i>	Feb 2026 - Apr 2026 (3 months - Virtual)
- Built and scaled 5+ workflow automation modules and 7+ backend REST APIs for a CA operations platform, streamlining automated financial reporting. - Architected and managed distributed, containerized infrastructure on Oracle Cloud Infrastructure (OCI), orchestrating 4 microservices with asynchronous job execution and real-time progress tracking. - Owned end-to-end delivery across the Software Development Life Cycle (SDLC) - system design, implementation, testing and deployment - for a live CA operations platform.	

SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL
- Frameworks/Libraries:** React.js, Node.js, Express.js, Next.js
- Developer Tools:** Git/GitHub, Linux, Docker
- Cloud (AWS):** EC2, S3, VPC, IAM, Lamda, RDS, DynamoDB, CloudWatch

ACHIEVEMENTS

- 1500+** Rating on LeetCode.
- Achieved **Runner-up** position in **HackByte 3.0** (Wikimedia Track) at IIIT Jabalpur, ranking **2nd out of 110** participating teams.
- Ranked among the **Top 2,000 Open Source Contributors** out of **30,000+ participants** in GirlScript Summer of Code (GSSoC) 2024.

PROJECTS

Co-Host: Tech Events Ticket Platform GitHub Demo	Jan 2026
- Built and integrated 5+ core backend workflows - payment verification, ticket generation, QR validation, coupon redemption and email notifications, enabling secure and reliable transaction processing. - Designed a 3 layer concurrency control architecture combining idempotency checks, database transactions and atomic operations mechanisms, ensuring consistent inventory management under high-concurrency workloads. - Implemented pull-based Stripe payment verification (no webhooks), preventing URL spoofing by validating session status server-side before order fulfillment.	
Zenith: Container-Based Deployment System GitHub Demo	Dec 2025
- Architected a distributed deployment platform with 3 microservices in a monorepo, automating repository cloning and isolated Docker container builds from a single GitHub URL input. - Engineered an asynchronous build pipeline using a Redis-backed job queue for reliable, decoupled task processing across services. - Implemented AWS S3 artifact storage and a custom request-routing layer supporting scalable static asset delivery, SPA fallback routing, and per-project subdomain hosting.	

CERTIFICATIONS

- | | |
|--|------------------|
| AWS Certified: Cloud Practitioner - Scored: 865/1000 . | June 2026 |
| Applied Machine Learning in Python - Coursera, Grade: 87.59% . | Nov 2024 |
| Microsoft Certified: Azure Fundamentals - Scored: 785/1000 . | Oct 2024 |
| 100 Days of Code: Python Bootcamp - Udemy, Grade: 92.19% . | Sep 2024 |

EXTRACURRICULAR ACTIVITIES

Technical Team Lead <i>Model United Nation Chapter</i>	Nov 2024 - May 2025
Led the technical team of 5+ members, organizing 3+ MUN events that drew 280+ participants.
